## Certificates:

ITI, Frontend Web Development

July 2023 – August 2023

## Projects:

### E-Commerce:

December 2024

E-Commerce API is a robust backend for an online store, built using .NET Core. It provides essential functionalities such as user authentication, product management, shopping cart operations, and payment processing using Stripe. The API is secured with JWT Bearer authentication and role-based authorization, ensuring secure access to resources.

### Movie Reservations:

November 2024

This project is a simple Movie Reservation System implemented using SQL Server. It provides a basic database schema and stored procedures to manage movie reservations, including user registration, movie listings, seat availability, and booking management.

### ATM Project:

October 2024

This project is an Automated Teller Machine (ATM) system implemented using SQL Server for the database and APIs. It provides a comprehensive solution for managing user accounts, transactions, and ATM operations such as balance inquiries, withdrawals, deposits, and transfers.

**Car Avenue Project:**

October 2024

I working with my team to build car sales agency website, we Built with Angular 18, for Frontend improvements we used HTML to create component interfaces, and CSS for styling.

**Movie Booking project:**

July 2023

I worked on building Booking Movies Website, admin Manages movies by adding, deleting, or updating them, and Users can book movie tickets and choose their preferred seats, Designed for user-friendly experience for moviegoers.

**Skills:**

---

**Language Skills**

Arabic: Native

English:B1.1 (intermediate)

**Technical Skills**

HTML

JavaScript

Bootsrap

C#

Data Structure

API

EF Core

JSON

CSS

TypeScript

Angular

OOP

.Net

Clean Code (SOLID)

DB(SQL Server)

**Computer Skills**

Visual studio code

Visual studio

Trello

**Familiar With:**

---

C

Java

UI/UX =&gt; Figma

ASP .Net Core

Github

ReactJs

NoSql(MongoDB)

NodeJs

Git
